Eddie Erlich

SENIOR SOFTWARE ENGINEER

Profile

Senior Software Engineer with **over 10 years** of experience designing and delivering scalable web and mobile applications. Demonstrates strong expertise in TypeScript and React, with a solid foundation in testing practices and cloud-native development on **AWS**, including services such as Lambda, SQS, SNS, S3, ECS, and CloudFront. Proven track record in leading system migrations, optimizing performance, and accelerating development through **AI-assisted tools** and workflows, including **Gemini, Claude, RooCode, Codex, and MCP-based** approaches. Holds full working rights in Australia.

Employment History

Senior Software Engineer, Rhino Eco

MARCH 2023 — JULY 2025

Tech stack: Next.js, React, MongoDB, GCP, Zod, Redis, Playwright, Tailwind

- Built a solar financing platform that transformed a 4-day manual quoting process into an automated single-screen application, reducing turnaround time to **minutes**.
- Migrated E2E testing from Cypress to Playwright, improving test execution performance by **30%** and enhancing CI/CD reliability.
- Implemented Tailwind CSS across the codebase, standardizing styling and significantly improving developer experience (DevEx).
- Managed GCP integration and optimized CI/CD pipelines to streamline deployment workflows and improve release frequency.

Senior Software Engineer, Venn

JULY 2021 — MARCH 2023

Tech stack: React Native, AWS, Microservices, GraphQL, Postgres, NX

- Led development of a React Native mobile application deployed across 7 U.S. states, increasing user engagement by **35%**.
- Migrated the codebase to an NX monorepo architecture, reducing onboarding time for new engineers and optimizing build processes.
- Maintained and optimized a distributed system of **10+ microservices**, ensuring high availability and system reliability.

Senior Software Engineer, Autodesk

APRIL 2019 — JULY 2021

Tech stack: TypeScript, Design Systems, Jest, Cypress

- Maintained a core TypeScript design system used by **20+ global engineering teams**, ensuring backward compatibility and stability.
- Implemented a comprehensive testing strategy using Jest and Cypress, reducing critical production bugs by **40%**.
- Led the migration of **100+ legacy UI components** to a modern, scalable architecture, improving maintainability and performance.

Software Engineer, Wix.com

DECEMBER 2015 — APRIL 2019

Tech stack: Angular, React, TypeScript

- Technical Lead for the Wix Inbox team (**1M+ users**), guiding the migration from AngularJS to React.
- Contributed to internal design systems and open-source libraries, accelerating company-wide development efforts.
